

ELEMENTS OF METRIC GEAR TECHNOLOGY

Table of Contents

	Page
SECTION 1 INTRODUCTION TO METRIC GEARS	T5
1.1 Comparison Of Metric Gears With American Inch Gears.....	T5
1.1.1 Comparison of Basic Racks.....	T5
1.1.2 Metric ISO Basic Rack.....	T5
1.1.3 Comparison of Gear Calculation Equations.....	T6
1.2 Metric Standards Worldwide.....	T6
1.2.1 ISO Standards.....	T6
1.2.2 Foreign Metric Standards.....	T6
1.3 Japanese Metric Standards In This Text.....	T6
1.3.1 Application of JIS Standards.....	T6
1.3.2 Symbols.....	T9
1.3.3 Terminology.....	T10
1.3.4 Conversion.....	T11
SECTION 2 INTRODUCTION TO GEAR TECHNOLOGY	T11
2.1 Basic Geometry Of Spur Gears.....	T12
2.2 The Law Of Gearing.....	T12
2.3 The Involute Curve.....	T12
2.4 Pitch Circles.....	T13
2.5 Pitch And Module.....	T13
2.6 Module Sizes And Standards.....	T13
2.7 Gear Types And Axial Arrangements.....	T15
2.7.1 Parallel Axes Gears.....	T16
2.7.2 Intersecting Axes Gears.....	T16
2.7.3 Nonparallel and Nonintersecting Axes Gears.....	T16
2.7.4 Other Special Gears.....	T17
SECTION 3 DETAILS OF INVOLUTE GEARING	T17
3.1 Pressure Angle.....	T17
3.2 Proper Meshing And Contact Ratio.....	T17
3.2.1 Contact Ratio.....	T18
3.3 The Involute Function.....	T18
SECTION 4 SPUR GEAR CALCULATIONS	T18
4.1 Standard Spur Gear.....	T18
4.2 The Generating Of A Spur Gear.....	T19
4.3 Undercutting.....	T19
4.4 Enlarged Pinions.....	T20
4.5 Profile Shifting.....	T20
4.6 Profile Shifted Spur Gear.....	T21
4.7 Rack And Spur Gear.....	T22
SECTION 5 INTERNAL GEARS	T22
5.1 Internal Gear Calculations.....	T22
5.2 Interference In Internal Gears.....	T23
5.3 Internal Gear With Small Differences In Numbers Of Teeth.....	T24
SECTION 6 HELICAL GEARS	T25
6.1 Generation Of The Helical Tooth.....	T25
6.2 Fundamentals Of Helical Teeth.....	T25
6.3 Equivalent Spur Gear.....	T26
6.4 Helical Gear Pressure Angle.....	T26
6.5 Importance Of Normal Plane Geometry.....	T26
6.6 Helical Tooth Proportions.....	T26
6.7 Parallel Shaft Helical Gear Meshes.....	T26
6.8 Helical Gear Contact Ratio.....	T27
6.9 Design Considerations.....	T27
6.9.1 Involute Interference.....	T27
6.9.2 Normal vs. Radial Module (Pitch).....	T27
6.10 Helical Gear Calculations.....	T27
6.10.1 Normal System Helical Gear.....	T27
6.10.2 Radial System Helical Gear.....	T28
6.10.3 Sunderland Double Helical Gear.....	T28
6.10.4 Helical Rack.....	T28
SECTION 7 SCREW GEAR OR CROSSED HELICAL GEAR MESHES	T30
7.1 Features.....	T30
7.1.1 Helix Angle and Hands.....	T30
7.1.2 Module.....	T30
7.1.3 Center Distance.....	T30
7.1.4 Velocity Ratio.....	T30

7.2	Screw Gear Calculations.....	T30
7.3	Axial Thrust Of Helical Gears.....	T31
SECTION 8	BEVEL GEARING	T32
8.1	Development And Geometry Of Bevel Gears.....	T32
8.2	Bevel Gear Tooth Proportions.....	T32
8.3	Velocity Ratio.....	T33
8.4	Forms Of Bevel Teeth.....	T33
8.5	Bevel Gear Calculations.....	T33
8.5.1	Gleason Straight Bevel Gears.....	T34
8.5.2	Standard Straight Bevel Gears.....	T34
8.5.3	Gleason Spiral Bevel Gears.....	T34
8.5.4	Gleason Zerol Spiral Bevel Gears.....	T37
SECTION 9	WORM MESH	T37
9.1	Worm Mesh Geometry.....	T38
9.1.1	Worm Tooth Proportions.....	T38
9.1.2	Number of Threads.....	T38
9.1.3	Pitch Diameters, Lead and Lead Angle.....	T38
9.1.4	Center Distance.....	T38
9.2	Cylindrical Worm Gear Calculations.....	T38
9.2.1	Axial Module Worm Gears.....	T39
9.2.2	Normal Module System Worm Gears.....	T39
9.3	Crowning Of The Worm Gear Tooth.....	T39
9.4	Self-Locking Of Worm Mesh.....	T41
SECTION 10	TOOTH THICKNESS	T42
10.1	Chordal Thickness Measurement.....	T42
10.1.1	Spur Gears.....	T42
10.1.2	Spur Racks and Helical Racks.....	T42
10.1.3	Helical Gears.....	T42
10.1.4	Bevel Gears.....	T42
10.1.5	Worms and Worm Gears.....	T42
10.2	Span Measurement Of Teeth.....	T42
10.2.1	Spur and Internal Gears.....	T42
10.2.2	Helical Gears.....	T42
10.3	Over Pin (Ball) Measurement.....	T46
10.3.1	Spur Gears.....	T46
10.3.2	Spur Racks and Helical Racks.....	T47
10.3.3	Internal Gears.....	T47
10.3.4	Helical Gears.....	T47
10.3.5	Three Wire Method of Worm Measurement.....	T47
10.4	Over Pins Measurements For Fine Pitch Gears With Specific Numbers Of Teeth.....	T47
SECTION 11	CONTACT RATIO	T58
11.1	Radial Contact Ratio Of Spur And Helical Gears, ϵ_α	T58
11.2	Contact Ratio Of Bevel Gears, ϵ_α	T58
11.3	Contact Ratio For Nonparallel And Nonintersecting Axes Pairs, ϵ	T58
11.4	Axial (Overlap) Contact Ratio, ϵ_β	T59
SECTION 12	GEAR TOOTH MODIFICATIONS	T59
12.1	Tooth Tip Relief.....	T59
12.2	Crowning And Side Relieving.....	T60
12.3	Topping And Semitopping.....	T60
SECTION 13	GEAR TRAINS	T60
13.1	Single-Stage Gear Train.....	T60
13.1.1	Types of Single-Stage Gear Trains.....	T60
13.2	Two-Stage Gear Train.....	T61
13.3	Planetary Gear System.....	T61
13.3.1	Relationship Among the Gears in a Planetary Gear System.....	T61
13.3.2	Speed Ratio of Planetary Gear System.....	T62
13.4	Constrained Gear System.....	T62
SECTION 14	BACKLASH	T63
14.1	Definition Of Backlash.....	T63
14.2	Backlash Relationships.....	T64
14.2.1	Backlash of a Spur Gear Mesh.....	T65
14.2.2	Backlash of Helical Gear Mesh.....	T65
14.2.3	Backlash of Straight Bevel Gear Mesh.....	T65
14.2.4	Backlash of a Spiral Bevel Gear Mesh.....	T65
14.2.5	Backlash of Worm Gear Mesh.....	T66
14.3	Tooth Thickness And Backlash.....	T66
14.4	Gear Train And Backlash.....	T66

14.5	Methods Of Controlling Backlash	T67
14.5.1	Static Method	T67
14.5.2	Dynamic Methods	T67
SECTION 15	GEAR ACCURACY	T68
15.1	Accuracy Of Spur And Helical Gears	T68
15.1.1	Pitch Errors of Gear Teeth.....	T68
15.1.2	Tooth Profile Error, f_f	T69
15.1.3	Runout Error of Gear Teeth, F_r	T69
15.1.4	Lead Error, f_{β}	T69
15.1.5	Outside Diameter Runout and Lateral Runout.....	T69
15.2	Accuracy Of Bevel Gears.....	T70
15.3	Running (Dynamic) Gear Testing	T70
SECTION 16	GEAR FORCES	T71
16.1	Forces In A Spur Gear Mesh	T71
16.2	Forces In A Helical Gear Mesh.....	T71
16.3	Forces In A Straight Bevel Gear Mesh	T72
16.4	Forces In A Spiral Bevel Gear Mesh	T73
16.4.1	Tooth Forces on a Convex Side Profile.....	T73
16.4.2	Tooth Forces on a Concave Side Profile.....	T73
16.5	Forces In A Worm Gear Mesh.....	T75
16.5.1	Worm as the Driver	T75
16.5.2	Worm Gear as the Driver	T75
16.6	Forces In A Screw Gear Mesh.....	T75
SECTION 17	STRENGTH AND DURABILITY OF GEARS	T76
17.1	Bending Strength Of Spur And Helical Gears	T76
17.1.1	Determination of Factors in the Bending Strength Equation	T76
17.1.2	Tooth Profile Factor, Y_F	T76
17.1.3	Load Distribution Factor, Y_{ϵ}	T76
17.1.4	Helix Angle Factor, Y_{β}	T78
17.1.5	Life Factor, K_L	T78
17.1.6	Dimension Factor of Root Stress, K_{FX}	T78
17.1.7	Dynamic Load Factor, K_V	T78
17.1.8	Overload Factor, K_O	T78
17.1.9	Safety Factor of Bending Failure, S_F	T78
17.1.10	Allowable Bending Stress at Root, σ_{Flim}	T78
17.1.11	Example of Bending Strength Calculation.....	T81
17.2	Surface Strength Of Spur And Helical Gears	T81
17.2.1	Conversion Formulas	T81
17.2.2	Surface Strength Equations	T81
17.2.3	Determination of Factors in the Surface Strength Equations	T82
17.2.3.A	Effective Tooth Width, b_H (mm)	T82
17.2.3.B	Zone Factor, Z_H	T82
17.2.3.C	Material Factor, Z_M	T82
17.2.4	Contact Ratio Factor, Z_{ϵ}	T82
17.2.5	Helix Angle Factor, Z_{β}	T83
17.2.6	Life Factor, K_{HL}	T83
17.2.7	Lubricant Factor, Z_L	T83
17.2.8	Surface Roughness Factor, Z_R	T83
17.2.9	Sliding Speed Factor, Z_V	T84
17.2.10	Hardness Ratio Factor, Z_W	T84
17.2.11	Dimension Factor, K_{HX}	T84
17.2.12	Tooth Flank Load Distribution Factor, $K_{H\beta}$	T84
17.2.13	Dynamic Load Factor, K_V	T84
17.2.14	Overload Factor, K_O	T84
17.2.15	Safety Factor for Pitting, S_H	T84
17.2.16	Allowable Hertz Stress, σ_{Hlim}	T84
17.2.17	Example of Surface Stress Calculation.....	T87
17.3	Bending Strength Of Bevel Gears	T88
17.3.1	Conversion Formulas	T88
17.3.2	Bending Strength Equations	T88
17.3.3	Determination of Factors in Bending Strength Equations	T88
17.3.3.A	Tooth Width, b (mm)	T88
17.3.3.B	Tooth Profile Factor, Y_F	T88
17.3.3.C	Load Distribution Factor, Y_{ϵ}	T89
17.3.3.D	Spiral Angle Factor, Y_{β}	T91
17.3.3.E	Cutter Diameter Effect Factor, Y_C	T91
17.3.3.F	Life Factor, K_L	T91
17.3.3.G	Dimension Factor of Root Bending Stress, K_{FX}	T91
17.3.3.H	Tooth Flank Load Distribution Factor, K_M	T91
17.3.3.I	Dynamic Load Factor, K_V	T91
17.3.3.J	Overload Factor, K_O	T91
17.3.3.K	Reliability Factor, K_R	T91
17.3.3.L	Allowable Bending Stress at Root, σ_{Flim}	T91
17.3.4	Examples of Bevel Gear Bending Strength Calculations	T92
17.4	Surface Strength Of Bevel Gears.....	T92
17.4.1	Basic Conversion Formulas	T92
17.4.2	Surface Strength Equations	T92

17.4.3	Determination of Factors in Surface Strength Equations.....	T93
17.4.3.A	Tooth Width, b (mm)	T93
17.4.3.B	Zone Factor, Z_H	T93
17.4.3.C	Material Factor, Z_M	T93
17.4.3.D	Contact Ratio Factor, Z_ϵ	T93
17.4.3.E	Spiral Angle Factor, Z_β	T93
17.4.3.F	Life Factor, K_{HL}	T93
17.4.3.G	Lubricant Factor, Z_L	T93
17.4.3.H	Surface Roughness Factor, Z_R	T93
17.4.3.I	Sliding Speed Factor, Z_V	T93
17.4.3.J	Hardness Ratio Factor, Z_W	T93
17.4.3.K	Dimension Factor, K_{HX}	T93
17.4.3.L	Tooth Flank Load Distribution Factor, $K_{H\beta}$	T94
17.4.3.M	Dynamic Load Factor, K_V	T94
17.4.3.N	Overload Factor, K_O	T94
17.4.3.O	Reliability Factor, C_R	T94
17.4.3.P	Allowable Hertz Stress, σ_{Hlim}	T94
17.4.4	Examples of Bevel Gear Surface Strength Calculations.....	T94
17.5	Strength Of Worm Gearing.....	T95
17.5.1	Basic Formulas	T95
17.5.2	Torque, Tangential Force and Efficiency	T95
17.5.3	Friction Coefficient, μ	T95
17.5.4	Surface Strength of Worm Gearing Mesh.....	T96
17.5.5	Determination of Factors in Worm Gear Surface Strength Equations	T96
17.5.5.A	Tooth Width of Worm Gear, b_2 (mm).....	T96
17.5.5.B	Zone Factor, Z	T96
17.5.5.C	Sliding Speed Factor, K_V	T97
17.5.5.D	Rotating Speed Factor, K_n	T97
17.5.5.E	Lubricant Factor, Z_L	T97
17.5.5.F	Lubrication Factor, Z_M	T98
17.5.5.G	Surface Roughness Factor, Z_R	T98
17.5.5.H	Contact Factor, K_c	T98
17.5.5.I	Starting Factor, K_s	T98
17.5.5.J	Time Factor, K_h	T98
17.5.5.K	Allowable Stress Factor, $S_{c,lim}$	T98
17.5.6	Examples of Worm Mesh Strength Calculation.....	T99
SECTION 18	DESIGN OF PLASTIC GEARS	T100
18.1	General Considerations Of Plastic Gearing	T100
18.2	Properties Of Plastic Gear Materials.....	T100
18.3	Choice Of Pressure Angles And Modules	T105
18.4	Strength Of Plastic Spur Gears.....	T106
18.4.1	Bending Strength of Spur Gears.....	T106
18.4.2	Surface Strength of Plastic Spur Gears.....	T107
18.4.3	Bending Strength of Plastic Bevel Gears.....	T108
18.4.4	Bending Strength of Plastic Worm Gears	T108
18.4.5	Strength of Plastic Keyway	T108
18.5	Effect Of Part Shrinkage On Plastic Gear Design.....	T108
18.6	Proper Use Of Plastic Gears.....	T109
18.6.1	Backlash.....	T109
18.6.2	Environment and Tolerances.....	T110
18.6.3	Avoiding Stress Concentration.....	T110
18.6.4	Metal Inserts.....	T110
18.6.5	Attachment of Plastic Gears to Shafts	T110
18.6.6	Lubrication.....	T110
18.6.7	Molded vs. Cut Plastic Gears.....	T111
18.6.8	Elimination of Gear Noise	T111
18.7	Mold Construction	T111
SECTION 19	FEATURES OF TOOTH SURFACE CONTACT	T114
19.1	Surface Contact Of Spur And Helical Meshes.....	T115
19.2	Surface Contact Of A Bevel Gear.....	T115
19.2.1	The Offset Error of Shaft Alignment	T115
19.2.2	The Shaft Angle Error of Gear Box	T115
19.2.3	Mounting Distance Error	T115
19.3	Surface Contact Of Worm And Worm Gear	T115
19.3.1	Shaft Angle Error.....	T116
19.3.2	Center Distance Error	T116
19.3.3	Mounting Distance Error	T116
SECTION 20	LUBRICATION OF GEARS	T116
20.1	Methods Of Lubrication	T116
20.1.1	Grease Lubrication.....	T117
20.1.2	Splash Lubrication.....	T117
20.1.3	Forced-Circulation Lubrication	T117
20.2	Gear Lubricants.....	T117
20.2.1	Viscosity of Lubricant	T117
20.2.2	Selection of Lubricant.....	T117
SECTION 21	GEAR NOISE	T120
REFERENCES AND LITERATURE OF GENERAL INTEREST	T121
